## Thoughts

This is an amendment to the 2nd Post I posted early in the morning of September 18, 2016.

Why I'm supporting Trump for president.

1. Trump believes we should be energy independent. We should no longer be a slave to Saudi oil. Ask why we are spending America's blood and treasure protecting the Saudi thugs. These people are not very nice people. They use us, over the last several decades it's been well published. They call themselves the Royal Family ha, when they come to America to meet with the elitists they make deals with, they hole up in their Washington DC penthouses have their meetings, after the meetings they remove rags and robes put on their speedos and thongs, brake out the liquor, bring in the elite DC prostitutes and the party begins.

The next day they put on their rags and robes and fly back to their so called Saudi Kingdom, laughing all the way home. Both Bush Presidents have has covered their ass every time they needed to, Ask why?

Do you honestly believe the Clintons would have done or will do anything different with their connections with the Saudi Thugs after they received over \$25 million dollars from them, give me a break. These Saudis are barbaric thugs. HRC calls Trump a misogynist, they call him a bigot wow, Isn't strange that HRC has never called the Saudi Thugs misogynist, bigots, after all women are 2nd class people in the so called Kingdom, they persecute an kill gays and lesbians rapping women is ok you must have at least four witnesses before you prove rape. Women cannot go out in public without an escort, man what a country. They teach the young to kill the infidels, hey that's us. Hussein Obama has continued the same practices, what else would you expect out of a Muslim sympathizer. Ask yourself again why we should spend America's blood and treasure protecting these thugs.

Again Trumps position with all of Americas natural resources when it comes to energy we need to get out of the Middle East, be completely energy independent gee what an idea. Let the Middle East fight out their own civil and religious wars. We need to rebuild our own country, make America First Again.
